OBJECTIVE

To help one of the greatest social programs by donating \$1 Million Dollars to City Green Urban Farmer and gardening. There are many useful projects in order to benefit the community in Passaic county and near areas.

OUR MISSION

- City Green is an urban farming and gardening organization, based in Clifton, New Jersey working to revitalize urban areas through agriculture and educational programming.
- It offers practical, technical and financial resources in support of environmental stewardship, equitable access to healthy food, and ecologically sustainable communities.
- City Green envisions livable, green urban communities that are socially, economically and environmentally rejuvenated.
- Growing healthy cities through urban farming, community & school gardens.
- The community garden and greening projects carried out by the community with the help of City Green gives residents access to bountiful fresh produce; youth have volunteer work and leadership opportunities in the community; and neighborhoods have welcoming, safe, natural respites that are a focal point for sociability, community involvement, cultural expression and individual empowerment.

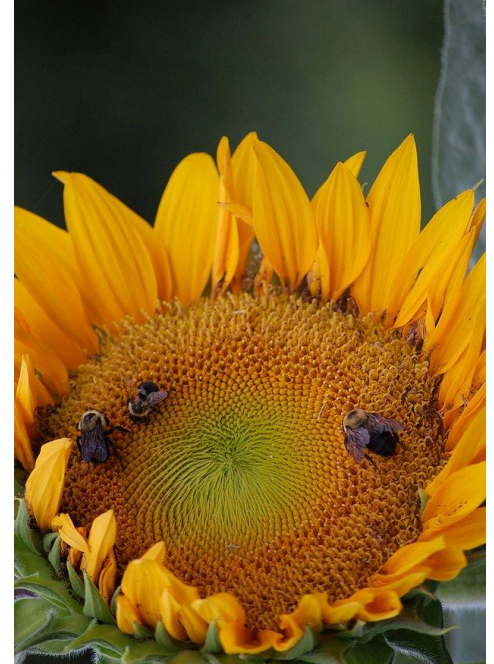

WHY CITY GREEN INC. NJ ?

- City Green is focused on growing as much food as possible in order to get it to people who need it the most.
- The community is the main goal
- The kids are priority for the programs
- The programs are oriented to improve mental health, healthy diet, and self improvement.

Our Programs

- City Green’s “Social Horticultural Therapy” programs partners with local organizations including rehabilitation centers, halfway houses, homeless shelters, housing projects, and other target communities to build beautiful outdoor spaces that nurture and heal those who need it most.
- Horticultural Therapy gardens provide a safe and nurturing outdoor environment in which participants can connect with nature in a peaceful and purposeful way while improving their mental, social, and physical health.
- Organizations that partner with City Green to build Horticultural Therapy gardens receive instructor training and ongoing support including the curriculum, resources, knowledge and enthusiasm.

Why invest in City Green?

- We **build healthier communities**, we **educate through our internship program**, will **provide hands on-work** and **educational experiences** and **independently-led projects** addressing public health concerns, nutrition, inequality and environmental stewardship.
- *Bees and animals are integral part of any sustainable farm operation.* City greens hosts **small herds** of goats and hens. We support the pollination of our fruits veggies and flowers while providing learning opportunity to visitors about **why bees population are so important to protect.**
- City Greens grows over **75 varieties of vegetables and herbs** that are not only culturally appropriate for the communities they serve, but healthy local and delicious as well. Each farm method includes **crop rotation, cover cropping, and natural pest management.**
- The produce grown at City Green's farms is distributed to the **local community** through a network of **farmer's markets and location-specific deliveries.** Through interaction with the farm operation, individuals are able to *create a connection to their food*, understand the **value and importance** of open space, **gain an appreciation for local agriculture**, and understand the potential of urban farming in revitalizing urban areas and improving public health in local communities.
